

COVID-19 CORONAVIRUS STATEMENT

JULY 19, 2022

We've all been impacted by the coronavirus pandemic and its variations. Many have experienced losses, and everyone has experienced disruptions to life. At Sahale, we continue to stay informed and do our best to make healthy decisions in an ever-changing world. We follow the most current CDC and state regulations.

The safety of the Goodenough Community's members and Sahale's guests continues to be very important to us. Sahale is open for visitors and events. We prefer that everyone is vaccinated and with boosters, however please just let us know if you are not vaccinated so we can be aware. Please do a COVID home self-test within 3 days of coming to visit and let one of us know that you tested negative. Please do not visit if you are not feeling well, even mild. Call before coming if you have questions. Thank you! Our best wishes as we all navigate the health of the global community together.
